SIMPLY THE STORY

Simply the Story (or STS) is an oral inductive method of teaching the Bible to both children and adults. Simply by staying within a Bible story, students learn and retain the Scriptures they hear, while the Holy Spirit Himself makes the application to their lives. Using the STS method, teachers learn and teach the way Jesus taught...through story and asking questions, with student participation. And the results are amazing! STS is now being used around the world to teach both those who cannot read or write, and those who can.

In this curriculum, every Bible study has its own set of pages and each page has been designed to bring support to the teacher as he or she teaches the Bible in the elementary ages. The vision behind this curriculum and how each separate page can aid in and reinforce the Bible study, is explained in this workshop.

TEACHING CHILDREN TO PRAY

God's design from the beginning is that people, young and old, would have a relationship with their Creator. But, knowing that no relationship is stronger than its communication, it becomes vital that we communicate with God. For without communication, the relationship becomes distant. But, through the glorious privilege of prayer, we are drawn into the very presence of a wonderful Holy God. Children too, can experience the blessing of talking with God through prayer. It is important that we teach them this while they are still young and this is what will be discussed in this workshop.
